

## OIL CLOTH SEEN IN THE MAKING AT LOCAL PLANT

Business Men Watch Interest-  
ing Process During Weekly  
Factory Tour.

### GREAT RESOURCES SHOWN

Blake Specialty Company and Bridge  
& Iron Works Also Come In  
For Inspection.

The largest party of business men yet to visit Rock Island's industries went on their weekly tour yesterday afternoon, despite bad weather. They saw the plants of the Standard Table Oilcloth company, Blake Specialty company, and the Rock Island Bridge & Iron works in operation. George H. Kingsbury, secretary of the Rock Island Business Men's association, conducted the tour, starting at 1:30 o'clock. Two hours and a half were taken to inspect the plants.

At the plant of the Standard Table Oilcloth company the visitors were taken through the various departments from the place where the oil to make the proper coating is boiled, to the bins containing the completed product. The plant puts out 190 different patterns of oilcloth. No fancy work is done, that line of work being left to the eastern branches of the same plant.

Comes in Large Rolls.

The cloth in large rolls is placed in machines for the dipping process. After being sent through several coatings for the proper color, according to sample books which operatives keep at hand, it goes to the figure machine. Three colors are all that can be offered in one pattern at the Rock Island plant. The figures which can be produced, however, are numerous. The demand for white oilcloth is becoming more general. Even the marble oilcloth is waning in favor, at times of the plant said.

The Standard Table Oilcloth company has an up-to-date plant in every detail. The plant furnishes its own power, buys the crude oil and boils it according to the needs of the concern in giving a varnish coat to its product, and otherwise has facilities within the plant, making it independent.

### Light Pedestal Unique.

The center of interest at the Blake Specialty company was a new cluster light pedestal which that plant is perfecting. Mayor H. M. Schriver, a member of the party, was particularly impressed with the lamp standard. It is provided with an open side, near the bottom, wherein waste papers, lying on the street near the lamp, might be deposited. The mayor thought such an idea might aid the effort to keep the streets of the city free from waste paper.

The afternoon "pour" was on at the Blake plant. The dipping and storage rooms of the plant were also visited.

See Sid Dredge.

An immense dredge was described when the men visited the Rock Island Bridge & Iron company. It is now practically completed and will be one of the largest on the river. Sand pits are being made of iron at the plant for delivery in Davenport soon. The powerful machines at the plant were interesting, especially those used in cutting the iron parts.

### VOLLEY BALL TOURNEY AT "Y" FRIDAY EVENING

A volley ball tournament will be held Friday evening at the Y. M. C. A. gymnasium in which business men from Moline, Davenport, Muscatine and Clinton are expected to compete, as well as a Rock Island team. The gymnasium gallery will be open to spectators without charge.

### Attention Local Contractors.

Contractors desiring to figure on our new five story bank and office building to be erected on the corner of Third avenue and Eighteenth street, can obtain plans and specifications by filing their request with H. E. Casteel, chairman building committee, not later than 2 p. m., Thursday, March 12, 1914.

### HOW TO PREVENT ACID STOMACHS AND FOOD FERMENTATION

By a Stomach Specialist.  
As a specialist who has spent many years in the study and treatment of stomach troubles, I have been forced to the conclusion that most people who complain of stomach trouble possess stomachs that are absolutely healthy and normal. The real trouble, that which causes all the pain and discomfort, is acid in the stomach, usually due to, or aggravated by, food fermentation. Acid irritates the delicate lining of the stomach and food fermentation causes wind which distends the stomach abnormally, causing that full, bloated feeling. Thus, both acid and fermentation interfere with the normal process of digestion. The stomach is usually healthy and normal, but irritated almost past endurance by these foreign elements—acid and wind. In all such cases—and they comprise over 90 per cent of all stomach difficulties—the first and only step necessary is to neutralize the acid and stop the fermentation by taking in a little warm or cold water, immediately after eating from one to two teaspoonsful of bisulphated magnesia, which is doubtless the best and only really effective anti-acid and food corrective known. The acid will be neutralized and the fermentation stopped almost instantly, and your stomach will at once proceed to digest the food in a healthy, normal manner. Be sure to ask your chemist for the bisulphated magnesia, as I have found other forms utterly lacking in the peculiarly valuable properties. F. J. C. (Adv.)

### A Notable March Merchandise Movement

TO STIR THINGS UP TREMENDOUSLY, we are offering unmatched prices in many sections of the store which will call out a house full of buyers.

We have planned and worked for this March sale, with an intensity of purpose and with results which you will see at every counter—the large New Stocks of latest and best styles, but beyond all the very marked lowering of prices.

All we need say, is come and see for yourself. If we are not accurate in every particular, tell us, that we may correct any oversight.

### The Claim of the McCabe Store Is This—

"Forty years of conducting a store for all the people, faithful service to the public—forty years of buying honest merchandise and selling it close to cost—forty years of telling the truth."

To prove this, we have the evidence of many thousands of patrons, hundreds of whom have been continuous customers of this store for nearly the entire period.

The many families that have been such a factor in helping create this business, whose faithful and loyal co-operation has been so constant and helpful, should receive due recognition for their share in the success of this enterprise.

### Melba Corsets

**THROAT  
Troubles  
ARE  
Dangerous**

because the swollen glands and inflamed membranes often affect other tissues and impair their healthy action.

Scott's Emulsion stands alone as a nature's corrector of throat troubles; its cod liver oil is speedily converted into germ-resisting tissue—the glycerine is curative and healing, while the combined emulsion builds the forces to avert the weakening influence which always follows throat troubles.

SCOTT'S EMULSION is best for three important reasons—it relieves the trouble; it prevents a relapse; it is not charged with alcohol or stupefying drugs.

Shun substitutes and insist on Scott's.

### Women's Outer Apparel and Millinery is an indication of our correctness in anticipating the tastes of the women of the three cities.

The many new style points, new materials, new lengths, flares, flounces, etc., all contribute to the desirability and necessity of a complete change in each woman's wardrobe.

The New Separate Coats and Skirts, as well as the new Suits, Dresses, Waists and Blouses are all so entirely different from the last season's modes as to make early selections imperative.

We are indeed fortunate to be so well prepared thus early in the season with such a full and varied collection that we can safely say we are able to satisfy nearly every taste and requirement.

With all this superb array of style, rich material and brilliant color, we have had great care for economy, so that no one need pay more than she wants.

### New Crepes and Rice Cloths Exquisitely Dainty

There are the tiny Pompadour rosebuds, the effective Jouy patterns and some new Cubist printings, all carried out in the small figures so much in demand for Spring and Summer frocks.
